

## TEXTILE MARKERS

### Description

The Texpen and Dalo Marker can be used on light fabrics like silk, cotton and natural fibres, giving a defined and permanent marking.

These textile markers are suitable for any marking application on textiles. A particular useful aspect of these markers is their long useful life under working conditions and that the ink flow is controlled by a spherical valve that minimises loss by evaporation.

The marks are permanently readable, the colors remain brilliant and they are totally resistant against boiling, dyeing, finishing and bleaching.

### Technical Details

Box	6 makers
Colors	Black, blue, orange, red, white or yellow
Tip	Fine (1.2 mm) or medium (2.4 mm)
