

Moisture balance

The moisture balance is a precision device for the rapid determination of moisture content in small samples of materials by drying the sample with halogen heaters.

It is used to determine the water content of paper, textiles, pharmaceuticals, chemicals, etc.

It features a large backlit LCD screen and a RS-232 interface.

Features

- Delivery includes flight case

Technical details

Capacity	0 - 50 g
Precision	0.001 g / 0.1 %
Heating	1 - 99 minutes
Pan size	90 mm ø
Temperature	50 - 180°C
Mains	230 V/50 Hz
Dimensions	30 x 16 x 14 cm
Weight	3 kg
