

# Handroller

Handrollers are used to apply pressure sensitive adhesive tapes to sample plates for further testing.

There is a rubber coated roller according to FINAT, weighing 2 kg and with a width of 50 mm, as well as a rubber coated roller according to AFERA and PSTC, weighing 2 kg (4.5 lbs) and with a width of 45 mm.

These rollers have a special construction that prevents the roller touching the table when not in use.

## Features

- According to FINAT, PSTC, AFERA or ASTM standard
- Apply tapes in a consistent way
