

Scorch Tester

Scorch tester, to determine the ironing and sublimation color fastness, of fabrics, as well as shrinkage to hot pressing and dry heat.

The three top plates have a precisely controlled weight, to ensure even pressure across the sample. Each plate temperature is individually controlled by means of a microprocessor, and a timer with automatic stop is also integrated.

Features

- 3 pairs of heating plates, temperature of each upper and lower plate can be set individually
- Large LCD display, convenient setting and operation
