

## Test Tape

tesa® 7475 has been successfully deployed for many years, both when it comes to assessing silicone coatings (FINAT 10 and similar) and the testing of the curing of silicone coatings (FINAT 11 or similar). For a comprehensive characterisation of release properties it is recommended to use both tesa® 7475 (acrylic adhesive) and tesa® 7476 (natural rubber adhesive). Other test tapes, like tesa® 4090, also available.

### Features

- Available per single roll
- Each roll sealed for long shelf life

### Technical details

Backing	PETP
Adhesive	Acrylic
Liner	Glassine
Width	1 inch
Length	55 yards
Colour	White

### Standards

FINAT 10 · FINAT 11
